

# Networks of infrastructure ZeroWaste Cluster

**Challenge:** Innovation in raw materials is dependent on capital-intensive infrastructure

**EIT Raw Materials solution: Networks of Infrastructure (NoI)**

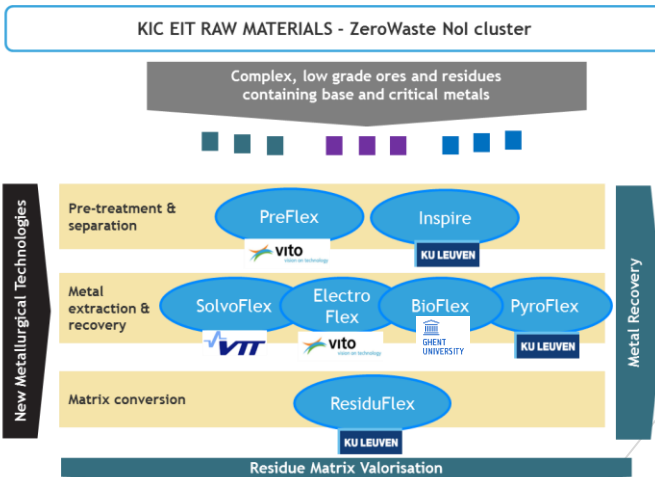

To help you in the challenging task of identifying the right technique, infrastructure and partner for YOUR case, we organize a matchmaking event during the last day of the Slag Valorisation Symposium, 5<sup>th</sup> April (13:40-15:00).

**Please visit us also in the EIT Raw Materials booth.**

*Get guided and connect with the partner(s) that are relevant for you!*

## ZeroWaste NoI cluster

- Aims at providing services for unit processes in the **ZeroWaste metallurgical toolbox**
- **Integrates** solvo-, electro-, bio- and pyrometallurgy together with pretreatment and residue valorisation
- Infrastructure and expertise for treatment of metal containing complex, low grade ores and residues
